

CHAPTER 7
SECTION 4.2

TRANSCERVICAL BLOCK SILICONE PLUG

Issue Date: April 19, 1983

Authority: [32 CFR 199.4\(d\)\(3\)\(vii\)](#)

I. DESCRIPTION

The transcervical block silicone plug is a device that is surgically secured in place in the Fallopian tubes for sterilization of the female.

II. POLICY

This device is classified as unproven by the U.S. Food and Drug Administration and therefore excluded as a benefit.
