3.0 BACKGROUND

3.1 The National Defense Authorization Act (**NDAA**) for Fiscal Year (FY) 1996 (Public Law 104-106, Section 701) signed into effect on February 10, 1996, expands well-baby visits and immunizations to family members under the age of six and establishes immunizations and comprehensive preventive benefits for family members age six and above to include health promotion and disease preventive visits provided in connection with immunizations, Papanicolaou (PAP) smears, and mammograms. The NDAA FY 1997 (**Public Law** 104-201, Section 701) signed into effect on September 23, 1996, further expands health care preventive services for colon and prostate cancer examinations. Periodic health examinations that include risk assessment, physical examination, laboratory tests, x-rays, and risk specific counseling will allow for the prevention, early detection and treatment of diseases before they manifest themselves as major health problems. Prior to these Acts, preventive services were quite limited. In addition to PAP smears, mammograms, and well-baby care up to the age of two, the only related services authorized under Extra and Standard plans in the absence of symptoms were immunizations for family members accompanying an active duty member on overseas duty. The expanded preventive services will generally be reflective of those currently being offered to Prime enrollees under the Uniform Health Maintenance Organization (HMO) Benefit (see [32 CFR 199.18\(b\)\(2\)](#)). **The NDAA FY 2009 (Public Law 110-417, Section 711) signed into effect October 14, 2008, waives copayment requirements for certain TRICARE beneficiaries for those preventive services as described in the TRICARE Reimbursement Manual (TRM), Chapter 2, Section 1, paragraphs 1.3.3.10 and 1.4.3. Appropriate cost-sharing and deductibles will apply for all other preventive services under Extra and Standard plans.**

3.2 While immunizations are provided as a specific exception to the general preventive care exclusion under the Regulation ([32 CFR 199.4\(g\)\(37\)](#)) and can be provided independently of other preventive services for those age six and older, the other expanded services (i.e., preventive

services reflective of those currently being offered to Prime enrollees under Uniform HMO Benefit) must be provided in connection with immunizations, PAP smears, mammograms, and other cancer screening authorized by 10 United States Code (USC) 1079. For example, if a eligible female goes in for a routine PAP smear, she is also eligible to receive a wide variety of other preventive services such as tuberculosis screening, rubella antibody screening, blood pressure screening, cholesterol screening test and preventive counseling services, to name a few. However, the same coverage will not be extended if she simply makes an appointment for a routine health promotion visit, where one or more of the associated preventive services (i.e., PAP smear, mammogram, immunization and/or other cancer screening authorized by 10 USC 1079) are not performed.

3.3 Preventive physical examinations (for example, oral cavity examinations for pharyngeal cancer, palpation for thyroid nodules, skin cancer screening, and examinations for testicular cancer) are paid under the same comprehensive health promotion and disease prevention examination office visit code (CPT² procedure codes 99381 - 99387 and 99391 - 99397) as the associated PAP smear, mammogram, immunization or other cancer screening examination authorized by 10 USC 1079. In other words, these additional physical examinations are being performed during the same office visit as required to perform the associated PAP smear, mammogram, immunization or other cancer screening authorized by 10 USC 1079.

4.0 POLICY

Preventive care is not directly related to specific illness, injury, a definitive set of symptoms, or obstetrical care, but rather is performed as a periodic health screening, health assessment, or periodic health maintenance. The following services may be provided during acute and chronic care visits or during preventive care visits for asymptomatic individuals to maintain and promote good health:

4.1 Health Promotion and Disease Prevention Examinations

The following prevention services are specific exceptions to the general preventive care exclusion under the Regulation. The contractor shall apply all appropriate claims processing and rebundling edits before determining if the following preventive services are individually reimbursable. The contractor need not establish additional edits to identify claims within the age, sex, race, or clinical history parameters included below:

4.1.1 Cancer Screening Examinations and Services

4.1.1.1 Breast Cancer

4.1.1.1.1 Physical Examination. For women under age 40, physicians may elect to perform clinical breast examination for those who are at high risk, especially those whose first-degree relatives have had breast cancer diagnosed before menopause. For women age 40 and older, annual clinical examinations should be performed.

4.1.1.1.2 X-ray mammography. Mammography (CPT² procedure codes 77052 and 77057) is recommended as a routine screening procedure (i.e., performed in the absence of any signs or

2.0 DESCRIPTION

Well-child care includes routine newborn care, health supervision examinations, routine immunizations, periodic health screening, and developmental assessment in accordance with the American Academy of Pediatrics (AAP) guidelines.

3.0 POLICY

Well-child care is covered for beneficiaries from birth to age six when services are provided by the attending pediatrician, family physician, ophthalmologist or optometrist, certified Nurse Practitioner (NP), or certified Physician Assistant (PA). Well-child services are considered preventive and are subject to the same cost-sharing/copayment and authorization requirements prescribed under the TRICARE Prime and Standard Clinical Preventive Services benefits, **except as described in the TRICARE Reimbursement Manual (TRM), Chapter 2, Section 1, paragraphs 1.3.3.10 and 1.4.3 (see paragraph and Sections 2.1 and 2.2).**

4.0 POLICY CONSIDERATIONS

4.1 Visits for diagnosis or treatment of an illness or injury are not included in the well-child benefit. Benefits should be extended on the basis of the medical necessity for the services.

4.2 For children whose health screening and immunizations may not be current, payment may be made for well-child visits and immunizations up to midnight of the day prior to the day the child turns six years old, and thereafter under the TRICARE Preventive Services (see [Sections 2.1](#) and [2.2](#)).

4.3 Immunizations are covered for age appropriate dose of vaccines that have been recommended and adopted by the Advisory Committee on Immunization Practices (ACIP) and accepted by the Director of the Centers for Disease Control and Prevention (CDC) and the Secretary of Health and Human Services (HHS) and published in a CDC **Morbidity and Mortality Weekly Report** (MMWR). Refer to the CDC's web site (<http://www.cdc.gov>) for access to the MMWRs and a

current schedule of CDC recommended vaccines. Immunizations required by dependents of active duty military personnel who are traveling outside the United States as a result of an active duty member's duty assignment, and such travel is being performed under orders issued by a Uniformed Service, are covered.

Note: The procedure codes in this policy are not necessarily an all-inclusive list of vaccines currently recommended by the CDC's ACIP.

4.4 Well-child care for newborns includes the routine care of the newborn in the hospital, newborn circumcision, and newborn metabolic screening as recommended by the AAP. In 2005, the AAP endorsed the newborn screening report from the American College of Medical Genetics that significantly expanded metabolic screening for newborn infants. These conditions include a core panel of 28 conditions and an additional secondary panel of 25 conditions. The most recently endorsed conditions for screening are reflected in the Department of Defense/Veteran Administration (DoD/VA) Clinical Practice Guideline. Only routine well-child care for newborns is covered as part of the mother's maternity episode, i.e., a separate cost-share is not required for the infant.

4.5 A program of well-child care conducted according to the most current Guidelines for Health Supervision, AAP, is covered. Significant deviation from the guidelines requires justification. In any case, no more than nine well-baby visits in two years are covered.

4.6 Each office visit for well-child care includes the following services:

4.6.1 History and physical examination and mental health assessment.

4.6.2 Developmental and behavioral appraisal.

4.6.2.1 Height and weight should be measured regularly throughout infancy and childhood.

4.6.2.2 Head circumference should be measured for children through 24 months of age.

4.6.2.3 Sensory screening: vision, hearing (by history).

4.6.2.3.1 Eye and vision screening by primary care provider during routine examination at birth, and approximately six months of age.

4.6.2.3.2 All high risk neonates (as defined by the Joint Committee on Infant Hearing) should undergo audiology screening before leaving the hospital. If not tested at birth, high-risk children should be tested before three months of age using Evoked Otoacoustic Emission (EOE) and/or Auditory Brainstem Response (ABR) testing.

4.6.2.3.3 All children should undergo hearing screening (by history) at each well-child visit, and children with possible hearing impairments should be referred for appropriate testing.

4.6.2.4 Dental screenings.

4.6.2.5 Discussion with parents, anticipatory guidance.

4.7 The following specific services are covered in a program of well-child care:

4.7.1 Immunizations are covered for age appropriate dose of vaccines recommended and adopted by CDC's ACIP. Immunizations recommended by dependents of active duty military personnel who are traveling outside the United States as a result of an active duty member's duty assignment, and such travel is being performed under orders issued by a Uniformed Service.

4.7.2 Tuberculin test: at 12 months of age and once during second year of age.

4.7.3 Hemoglobin or hematocrit testing: once during first year of age, once during second year of age.

4.7.4 Urinalysis: once during first year of age, once during second year of age.

4.7.5 Annual blood pressure screening for children between three and six years of age.

4.7.6 Blood lead test: (CPT² procedure code 83655): Assessment of risk for lead exposure by structured questionnaire based on CDC Preventing Lead Poisoning in Young (October 1991) during each well-child visit from age six months to under six years of age.

4.7.7 Health guidance and counseling, including breast feeding and nutrition counseling.

4.7.8 One routine eye examination by an ophthalmologist or optometrist every two years beginning at age three. The routine eye exams offered between the ages of three and six should include screening for amblyopia and strabismus.

4.7.9 Additional services or visits required because of specific findings or because the particular circumstances of the individual case are covered if medically necessary and otherwise authorized for benefits.

Well-child services are considered preventive and are subject to the same cost-sharing/copayment and authorization requirements as prescribed under TRICARE Preventive Services, **except for well-child visits and immunizations as described in the TRM, Chapter 2, Section 1, paragraphs 1.3.3.10 and 1.4.3** (see Sections 2.1 and 2.2).
