

DEPARTMENT OF DEFENSE (DoD) ENHANCED ACCESS TO AUTISM SERVICES DEMONSTRATION

1.0. PURPOSE

The Enhanced Access to Autism Services Demonstration (“Demonstration”) provides TRICARE reimbursement for Educational Interventions for Autism Spectrum Disorders (EIA). This Demonstration will enable the Department of Defense (DoD) to determine whether:

- There is increased access to these services;
- The services are reaching those most likely to benefit from them;
- The quality of those services is meeting a standard of care currently accepted by the professional community of providers, including the Behavior Analyst Certification Board (BACB); and
- Requirements are met for State licensure and certification where such exists.

2.0. BACKGROUND

2.1. The Military Health System (MHS) includes 59 military hospitals, over 350 military health clinics, and an extensive network of private sector health care partners, that provides medical care for more than nine million beneficiaries, including Active Duty Service Members (ADSMs) and Active Duty Family Members (ADFMs).

2.2. Autistic Spectrum Disorders (ASD) affect essential human behaviors such as social interaction, the ability to communicate ideas and feelings, imagination, and the establishment of relationships with others.

2.3. A number of EIA services, such as Applied Behavior Analysis (ABA), have been introduced to ameliorate the negative impact of autism. Currently, ABA is the only EIA service accepted within the MHS as having been shown to reduce or eliminate specific problem behaviors and teach new skills to individuals with ASD. ABA therapy is rendered by TRICARE-authorized providers as a Special Education benefit under the Extended Care Health Option (ECHO). Only those individuals who are licensed or certified by a State or certified by the BACB (<http://www.bacb.com>) as a Board Certified Behavior Analyst (BCBA) or a Board Certified Assistant Behavior Analyst (BCaBA) are eligible to be TRICARE-authorized providers of ABA.

2.4. The Demonstration allows TRICARE reimbursement for EIA services, referred to as Intensive Behavioral Interventions in the Federal Register Demonstration Notice (72 FR 68130, December 4, 2007), delivered by paraprofessional providers under a modified Corporate Services Provider (CSP) model.

3.0. DEFINITIONS

3.1. Applied Behavior Analysis (ABA)

A well-developed discipline with a mature body of scientific knowledge, established standards for evidence-based practice, distinct methods of service, recognized experience and educational requirements for practice, and identified sources of requisite education. Information regarding the content of ABA is contained in the BACB Behavior Analysis Task List, available at <http://www.bacb.com/Downloadfiles/AutismTaskList/708AutismTaskListF.pdf>.

3.2. Autism Spectrum Disorders (ASD)

3.2.1. Collective term indicating Autistic Disorder (AD), Childhood Disintegrative Disorder (CDD), Asperger's Syndrome (AS), and Pervasive Developmental Disorder Not Otherwise Specified (PDDNOS) as defined by the American Psychiatric Association's (APA's) Diagnostic and Statistical Manual of Mental Disorders, Fourth Edition, Text Revision (DSM-IV-TR).

3.2.2. Significant symptoms associated with ASD include communication and social behavior deficits, and behaviors concerning objects and routine.

3.2.2.1. Communication deficits include a lack of speech, especially when associated with the lack of desire to communicate and lack of nonverbal compensatory efforts such as gestures.

3.2.2.2. Social Skills Deficits. Children with ASD demonstrate a decreased drive to interact with others and share complementary feeling states. Children with ASD often appear to be content being alone, ignore their parents' and others' bids for attention with gestures or vocalizations and seldom make eye contact.

3.2.2.3. Restricted, Repetitive, and Stereotyped Patterns of Behavior, Interests, and Activities. Children with ASD can demonstrate atypical behaviors in a variety of areas including peculiar mannerisms, unusual attachments to objects, obsessions, compulsions, self-injurious behaviors, and stereotypes. Stereotypes are repetitive, nonfunctional, atypical behaviors such as hand flapping, finger movements, rocking, or twirling.

3.3. Behavior Plan (BP)

A written assessment of the objectives and goals of behavior modification and the specific evidence-based practices and techniques to be utilized. Requirements for the BP are specified in [paragraph 7.0](#).

3.4. Educational Interventions for Autism Spectrum Disorders (EIA)

Individualized interventions, as specified in the BP, to systematically increase adaptive behaviors and modify maladaptive or inappropriate behaviors. Under the Demonstration, only ABA, as defined by the BACB, is authorized and reimbursable.

3.5. EIA Progress Report (EPR) And Updated BP

A report of the individual's progress towards achieving the behavioral goals and objectives specified in the BP. The report also revises the BP to reflect new or modified goals, objectives and strategies. Requirements for the EPR and the updated BP are specified in [paragraphs 7.2.](#) and [7.3.](#), respectively.

3.6. Functional Behavioral Assessment And Analysis

The process of identifying the variables that reliably predict and maintain problem behaviors. The functional behavioral assessment and analysis process typically involves:

- Identifying the problem behavior(s); and
- Developing hypotheses about the antecedents and consequences likely to trigger or support the problem behavior; and
- Performing an analysis of the function of the behavior by testing the hypotheses.

3.7. Individuals With Disabilities Education Act (IDEA)

Public Law 108-446, December 3, 2004 (20 U.S.C. 1400 et seq.): The United States law that entitles all children, including those with a disability, to a Free Appropriate Public Education (FAPE).

3.8. Individualized Family Service Plan (IFSP)

A multidisciplinary assessment and plan that specifies the unique strengths, services and resources needed by an infant or toddler (age zero to three years) with a developmental disability or who is at risk for such, and his/her family.

3.9. Individualized Education Program (IEP)

A multidisciplinary assessment and plan that specifies the objectives, goals and related services associated with providing a FAPE to a child with a disability.

3.10. Special Education

Specially designed instruction to meet the unique FAPE needs, as specified in the IEP, of a child with a disability,
