 ADDENDUM G (FY 2008)

TRICARE-AUTHORIZED RESIDENTIAL TREATMENT CENTERS - FOR
 PAYMENT OF SERVICES PROVIDED ON OR AFTER 10/01/2007

The rates in this Appendix will be used for payment of claims for services rendered on or after October 1, 2007. The rates were adjusted by the lesser of the FY 2007 Medicare update factor (3.4%) or the amount that brought the rate up to the new cap amount of \$717.

NOTE: This listing is for residential treatment center per diem rates only. It does not reflect a facility's current status as a TRICARE-authorized residential treatment center. Information regarding a facility's current status as an authorized provider can be obtained from the appropriate contractor.

as long as they do not exceed what would have otherwise been allowed under Standard TRICARE payment methodologies.

G. Split Payments (Initial and Final Payments).

1. A split percentage approach has been taken in the payment of HHAs in order to minimize potential cash-flow problems.

a. A split percentage payment will be made for most episode periods. There will be two payments (initial and final) - the initial paid in response to a Request for Anticipated Payment (RAP), and the final in response to a claim. Added together, the initial and final payments equal 100% of the permissible reimbursement for the episode.

b. There will be a difference in the percentage split of initial and final payments for initial and subsequent episodes for patients in continuous care. For all initial episodes, the percentage split for the two payments will be 60% in response to the RAP, and 40% in response to the claim. For all subsequent episodes in periods of continuous care, each of the two percentage payments will equal 50% of the estimated case-mix adjusted episode payment. There is no set length required for a gap in services between episodes for a following episode to be considered initial rather than subsequent. If any gap occurs, the next episode will be considered initial for payment purposes.

c. The HHA may request and receive accelerated payment if the contractor fails to make timely payments. While a physician's signature is not required on the POC for initial payment, it is required prior to claim submission for final payment.

H. Calculation of Prospective Payment Amounts.

1. National 60-Day Episode Payment Amounts.

a. Medicare, in establishment of its prospective payment amount, included all costs of home health services derived from audited Medicare cost reports for a nationally representative sample of HHAs for Fiscal Year (FY) 1997. Base-year costs were adjusted using the latest available market basket increases between the cost reporting periods contained in the database and September 30, 2001. Total costs were divided by total visits in establishing an average cost per visit per discipline. The discipline specific cost per visit was then multiplied by the average number of visits per discipline provided within a 60-day EOC in the establishment of a home health prospective payment rate per discipline. The 60-day utilization rates were derived from Medicare home health claims data for FY 1997 and 1998. The prospective payment rates for all six disciplines were summed to arrive at a total non-standardized prospective payment amount per 60-day EOC.

b. [Figure 12-4-14](#) provides the calculations involved in the establishment of the non-standardized prospective payment amount per 60-day episode in FY 2001, along with adjustments for NRS, Part B therapies and OASIS implementation and ongoing costs.

c. The adjusted non-standardized prospective payment amount per 60-day episode for FY 2001 was adjusted as follows in [Figure 12-4-15](#) for case-mix, budget neutrality and outliers in the establishment of a final standardized and budget neutral payment amount per 60-day episode for FY 2001.

FIGURE 12-4-15 STANDARDIZATION FOR CASE-MIX AND WAGE INDEX

\$2,416.01	0.96184	0.88423	1.05	\$2,115.30

(1) The above 60-day episode payment calculations were derived using base-year costs and utilization rates and subsequently adjusted by annual inflationary update factors, the last three iterations of which can be found in [Addendum L \(CY 2007\)](#), [Addendum L \(CY 2008\)](#), and [Addendum L \(CY 2009\)](#).

(2) The standardized prospective payment amount per 60-day EOC is case-mix and wage-adjusted in determining payment to a specific HHA for a specific beneficiary. The wage adjustment is made to the labor portion (0.77668) of the standardized prospective payment amount after being multiplied by the beneficiary’s designated HHRG case-mix weight. For example, a HHA serves a TRICARE beneficiary in Denver, CO. The HHA determines the patient is in HHRG C2F1S2 with a case-mix weight of 1.8496. The following steps are used in calculating the case-mix and wage-adjusted 60-day episode payment amount:

TRICARE REIMBURSEMENT MANUAL 6010.55-M, AUGUST 1, 2002

CHAPTER 12, SECTION 4

HOME HEALTH BENEFIT COVERAGE AND REIMBURSEMENT - PROSPECTIVE PAYMENT METHODOLOGY

STEP 1: Multiply the standard 60-day prospective payment amount by the applicable case-mix weight.

$$(1.8496 \times \$2,115.30) = \$3,912.46$$

STEP 2: Divide the case-mix adjustment episode payment into its labor and non-labor portions.

$$\text{Labor Portion} = (0.77668 \times \$3,912.46) = \$3,038.73$$

$$\text{Non-Labor Portion} = (0.22332 \times \$3,912.46) = \$873.73$$

STEP 3: Adjust the labor portion by multiplying by the wage index factor for Denver, CO.

$$(1.0190 \times \$3,038.73) = \$3,096.47$$

STEP 4: Add the wage-adjusted labor portion to the non-labor portion to calculate the total case-mix and wage-adjusted episode payment.

$$(\$873.73 + \$3,096.47) = \boxed{\$3,970.20}$$

d. Since the initial methodology used in calculating the case-mix and wage-adjusted 60-day episode payment amounts have not changed, the above example is still applicable using the updated wage indices and 60-day episode payment amounts (both the all-inclusive payment amount and per-discipline payment amount) contained in [Addendum L \(CY 2007\)](#), [Addendum L \(CY 2008\)](#), [Addendum L \(CY 2009\)](#), [Addendum M \(CY 2007\)](#), [Addendum M \(CY 2008\)](#), and [Addendum M \(CY 2009\)](#).

e. Annual Updating of HHA PPS Rates and Wage Indexes.

(1) In subsequent fiscal years, HHA PPS rates (i.e., both the national 60-day episode amount and per-visit rates) will be increased by the applicable home health market basket index change.

(2) Three iterations of these rates will be maintained in [Addendum L \(CY 2007\)](#), [Addendum L \(CY 2008\)](#), and [Addendum L \(CY 2009\)](#). These rate adjustments are also integral data elements used in updating the Pricer.

(3) Three iterations of wage indexes will also be maintained in [Addendum M \(CY 2007\)](#), [Addendum M \(CY 2008\)](#), and [Addendum M \(CY 2009\)](#) for computation of individual HHA payment amounts. These hospital wage indexes will lag behind by a full year in their application.

2. Calculation of Reduced Payments.

o. Under certain circumstances, payment will be less than the full 60-day episode rate to accommodate changes of events during the beneficiary's care. The start and end dates of each event will be used in the apportionment of the full-episode rate. These

TRICARE REIMBURSEMENT MANUAL 6010.55-M, AUGUST 1, 2002

CHAPTER 12, SECTION 4

HOME HEALTH BENEFIT COVERAGE AND REIMBURSEMENT - PROSPECTIVE PAYMENT METHODOLOGY

reduced payment amounts are referred to as: 1) PEP adjustments; 2) SCIC adjustments; 3) LUPAs; and 4) therapy threshold adjustments. Each of these payment reduction methodologies will be discussed in greater detail below.

NOTE: Since the basic methodology used in calculating HHA PPS adjustments (i.e., payment reductions for PEPs, SCICs, LUPAs, and therapy thresholds) have not changed, the following examples are still applicable using the updated wage indices and 60-day episode payment amounts in [Addendum L \(CY 2007\)](#), [Addendum L \(CY 2008\)](#), [Addendum L \(CY 2009\)](#), [Addendum M \(CY 2007\)](#), [Addendum M \(CY 2008\)](#), and [Addendum M \(CY 2009\)](#).

(1) PEP Adjustment. The PEP adjustment is used to accommodate payment for EOCs less than 60 days resulting from one of the following intervening events: 1) beneficiary elected a transfer prior to the end of the 60-day EOC; or 2) beneficiary discharged after meeting all treatment goals in the original POC and subsequently readmitted to the same HHA before the end of the 60-day EOC. The PEP adjustment is based on the span of days over which the beneficiary received treatment prior to the intervening event; i.e., the days, including the start-of-care date/first billable service date through and including the last billable service date, before the intervening event. The original POC must be terminated with no anticipated need for additional home health services. A new 60-day EOC would have to be initiated upon return to a HHA, requiring a physician's recertification of the POC, a new OASIS assessment, and authorization by the contractor. The PEP adjustment is calculated by multiplying the proportion of the 60-day episode during which the beneficiary was receiving care prior to the intervening event by the beneficiary's assigned 60-day episode payment. The PEP adjustment is only applicable for beneficiaries having more than four billable home health visits. Transfers of beneficiaries between HHAs of common ownership are only applicable when the agencies are located in different metropolitan statistical areas. Also, PEP adjustments do not apply in situations where a patient dies during a 60-day EOC. Full episode payments are made in these particular cases. For example, a beneficiary assigned to HHRG C2F1S2 and receiving care in Denver, CO was discharged from a HHA on Day 28 of a 60-day EOC and subsequently returned to the same HHA on Day 40. However, the first billable visit (i.e., a physician ordered visit under a new POC) did not occur until Day 42. The beneficiary met the requirements for a PEP adjustment, in that the treatment goals of the original POC were accomplished and there was no anticipated need for home care during the balance of the 60-day episode. Since the last visit was furnished on Day 28 of the initial 60-day episode, the PEP adjustment would be equal to the assigned 60-day episode payment times 28/60, representing the proportion of the 60 days that the patient was in treatment. Day 42 of the original episode becomes Day 1 of the new certified 60-day episode. The following steps are used in calculating the PEP adjustment:

STEP 1: Calculate the proportion of the 60 days that the beneficiary was under treatment.

$$(28/60) = 0.4667$$

STEP 2: Multiply the beneficiary assigned 60-day episode payment amount by the proportion of days that the beneficiary was under treatment.

$$(\$3,970.20 \times 0.4667) = \boxed{\$1,852.90}$$

(2) SCIC Payment Adjustment.

(c) For Episodes Beginning Prior To January 1, 2008. The full episode payment amount is adjusted if the beneficiary experiences a SCIC during a 60-day episode that was not envisioned in the initial treatment plan. It reflects a proportional payment adjustment for both the time prior to and after the SCIC and results in the assignment of a new HHRG. The new HHRG is assigned based on the HHA's revised OASIS assessment, accompanied by appropriate changes in the physician's POC. The apportionment of payment is a two-part process. The first part involves determining the proportion of the 60-day episode prior to the SCIC and multiplying it by the original episode payment amount. The second part entails the multiplying of the remaining proportion of the 60-day episode after the SCIC by the new episode payment level initiated through the certification and assessment process. For example, a Denver, CO HHA assigns a beneficiary to HHRG C2F1S2 that equals \$3,970.20. The beneficiary's first billable day is Day 1. The beneficiary experiences a SCIC on Day 16. The last billable service day prior to the SCIC was Day 18. The HHA completes a new OASIS assessment and obtains the necessary physician orders to change the case-mix assignment to HHRG C3F2S3, which equals \$5,592.96. The HHA starts rendering services under the revised POC and at the new case-mix level on Day 22. Days 1 through 18 are used in calculating the first part of the SCIC adjustment, while Days 22 through 60 are used in calculating the second part of the SCIC adjustment. The following steps are used in calculating SCIC payment adjustment:

STEP 1: Multiply the proportion of the 60-day episode before the SCIC by the original episode payment amount.

$$(\text{Day 1 - Day 18}) 18/60 \times \$3,970.20 = \$1,191.06$$

STEP 2: Multiply the remaining proportion of the 60-day episode after the SCIC by the new episode payment amount.

$$(\text{Day 22 - Day 60}) 39/60 \times \$5,592.96 = \$3,635.42$$

STEP 3: Add the episode payment amounts from Steps 1 and 2 to obtain the total SCIC adjustment.

$$(\$1,191.06 + \$3,635.42) = \boxed{\$4,826.48}$$

(b) For Episodes Beginning On Or After January 1, 2008. The refined HH PPS no longer contains a policy to allow for adjustments reflecting SCICs. Episodes paid under the refined HH PPS will be paid based on a single HIPPS code. Claims submitted with additional HIPPS codes reflecting SCICs will be returned to the provider; i.e., claims for episodes beginning on or after January 1, 2008, that contain more than one revenue code 0023 line.

(3) LUPA.

(c) For Episodes Beginning Prior To January 1, 2008.

CHAPTER 12, SECTION 4

HOME HEALTH BENEFIT COVERAGE AND REIMBURSEMENT - PROSPECTIVE PAYMENT METHODOLOGY

1 The LUPA reduces the 60-day episode payments, or PEP amounts, for those beneficiaries receiving less than five home health visits during a 60-day EOC. Payment for low-utilization episodes are made on a per-visit basis using the cost-per-visit rates by discipline calculated in [Figure 12-4-1](#) plus additional amounts for: 1) NRS paid under a home health POC; 2) NRS possibly unbundled to Part B; 3) per-visit ongoing OASIS reporting adjustment; and 4) one-time OASIS scheduling implementation change. These cost-per-visit rates are standardized for wage index and adjusted for outliers to come up with final wage standardized and budget neutral per-visit payment amounts for 60-day episodes as reflected in [Figure 12-4-16](#).

* Combined average cost per-visit amounts for NRS reported as costs on the cost report and those which could have been unbundled and billed separately to Part B.

2 The per-visit rates per discipline are wage-adjusted but not case-mix adjusted in determining the LUPA. For example, a beneficiary assigned to HHRG C2L1S2 and receiving care in a Denver, CO, HHA has one skilled nursing visit, one physical therapy visit and two home health visits. The per-visit payment amount (obtained from [Figure 12-4-16](#)) is multiplied by the number of visits for each discipline and summed to obtain an unadjusted low-utilization payment amount. This amount is then wage-adjusted to come up with the final LUPA. The following steps are used in calculating the LUPA:

NOTE: Since the basic methodology used in calculating HHA PPS outliers has not changed, the following example is still applicable using the updated wage indices, 60-day episode payment amounts and Fixed Dollar Loss (FDL) amounts in [Addendum L \(CY 2007\)](#), [Addendum L \(CY 2008\)](#), [Addendum L \(CY 2009\)](#), [Addendum M \(CY 2007\)](#), [Addendum M \(CY 2008\)](#), [Addendum M \(CY 2009\)](#) and N.

STEP 1: Multiple the per-visit rate per discipline by the number of visits and add them together to get the total unadjusted low-utilization payment amount.

Skilled nursing visits (1 x \$95.79)	=	\$ 95.79
Physical therapy visits (1 x \$104.74)	=	\$104.74
Home health aide visits (2 x \$43.37)	=	\$ 86.74
<u>Total unadjusted payment amount</u>		<u>\$287.27</u>

ANNUAL HHA PPS RATE UPDATES - CALENDAR YEAR 2009

(Final payment amounts per 60-day episodes ending on or after January 1, 2009 and before January 1, 2010 - Continuing Calendar Year (CY) update.)

Home Health Agency Prospective Payment System (HHA PPS) - Determination of Standard HHA PPS

Section 1895(b)(3)(B) of the Act, as amended by section 5201 of the Deficit Reduction Act (DRA), requires for CY 2009 that the standard prospective payment amount be increased by a factor equal to the applicable home health market basket update for HHAs.

National 60-Day Episode Payment Amounts - CY 2009

In order to calculate the CY 2009 national standardized 60-day episode, the CY 2008 national standardized 60-day episode payment of \$2,270.32 was increased by the home health market basket update of 2.9% and then reduced by 2.75% to account for the change in case-mix that is not related to the real change in patient acuity levels as reflected in [Figure 12-L-2009-1](#):

Payment of LUPA Episodes

Payment for LUPA episodes changed in CY 2008 in that for LUPAs that occur as initial episodes in a sequence of adjacent episodes or as the only episode, an additional payment amount is added to the LUPA payment. The [Figure 12-L-2009-2](#) per-visit rates noted above are before that additional payment is added to the LUPA payment, and are the per-visit rates paid to all other LUPA episodes and used in computing outlier payments. LUPA episodes that occur as the only episode or initial episode in a sequence of adjacent episodes are adjusted by adding an additional amount to the LUPA payment before adjusting for wage index. For CY 2008, that amount was \$87.93. This additional LUPA amount is updated in the same manner as the national standardized 60-day episode payment amount and the per-visit rates (i.e., by the home health market basket percentage update). Consequently, for CY 2009, the additional amount paid to LUPAs that occur as initial episodes in a sequence of adjacent episodes or as the only episode is \$90.48 (\$87.93 x 1.029).

Severity Non-Routine Medical Supplies (NRS) System

Beginning in CY 2008, to ensure that the variation in NRS is more appropriately reflected in the HH PPS, the original portion (\$49.62) of the HH PPS base rate that accounted for NRS, was replaced with a system that pays for NRS based on six severity groups. Payments for NRS are updated by the home health market basket and reduced by the 2.75% reduction in the rates through the updating of the NRS conversion factor. NRS payments are computed by multiplying the relative weight for a particular severity level by the NRS conversion factor. The NRS conversion factor for CY 2009 is \$52.29 (52.35 x (1.029 x (1 - 0.0275))). The payment amounts for the various severity levels based on the updated conversion factor are calculated in [Figure 12-L-2009-3](#):
